## Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ichimaru U.S. Patent 5,393,063 in view of Wood et al U.S. Patent 5,868,388 and Nelson U.S. Patent 3,788,645.

Ichimaru disclosed a three-dimensional puzzle comprising a plurality of interconnected cubes, the puzzle comprising one piece with one small cube (8) (Fig. 2), one piece with three small cubes (10) (Fig. 2), and one piece with six small cubes (11) (Fig. 2). It is noted that Ichimaru failed to teach six pieces with four small cubes and six pieces with five small cubes as set forth in claim 1. However, Wood et al teaches it is known in the art to provide a three-dimensional puzzle with at least 6 pieces with five small cubes as shown Fig. 1; and Nelson teaches it is known in the art to provide a three-dimensional puzzle with six pieces with four small cubes as shown in Fig. 3. Therefore, it would have been obvious to one of ordinary skill in the art to modify the puzzle of Ichimaru with the puzzle pieces as taught by Wood et al and Nelson for the advantage of expanding the difficulty of the puzzle.

Regarding claim 2, although the combination of Ichimaru, Wood et al, and Nelson disclosed the cubes made by material such as polyester resin instead of wood, such wooden cubes in puzzle pieces are very well known in the art and it does not wood has

Art Unit: 3712

any significant advantage over other equivalent material. Accordingly, it would have been obvious to one of ordinary skill in the art to make the cubes of the combination Ichimaru, Wood et al, and Nelson with any equivalent material such as wood to accommodate any type of user and cost.

Regarding claims 3 and 4, these claims appear to recite only the intended uses of the puzzle cubes, the puzzle cubes of Wood et al could be used in computer games (see column 14, lines 56-67). Accordingly, the combination of Ichimaru, Wood et al and Nelson is certainly capable of being used in any computer or electronic application.

## Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The enclosed references are cited for interest.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kien T. Nguyen whose telephone number is (703) 308-2493. The examiner can normally be reached on 7:30 AM-5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Derris Banks can be reached on (703) 308-1745. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-3579 for regular communications and (703) 305-3579 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1148.
